-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 04/30/2008 has been entered.

Response to Arguments

2. Applicant's arguments with respect to claims 15-18 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 112

3. Claims 15, 17 and 18 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. The Examiner notes that the specification does not teach the newly added limitations "calculating first transform conditions, each of which is for transforming an orientation of a respective one of the plurality of image sensing devices at a target image frame into an orientation at a predetermined image frame which is different from the target image frame; obtaining second transform conditions, each of which corresponds to a respective one of the plurality of image sensing devices, based on each of coordinate systems of the image sensing devices and a coordinate of a virtual image sensing device; calculating, for each of the image sensing devices, a respective orientation of the virtual

image sensing device at the predetermined image frame based on the first and second transform conditions; calculating, based on the calculated orientations of the virtual image sensing device, correction transforms each of which is for reducing a shakiness of respective image sensing devices at the target image frame".

4. Claim 16 is rejected based upon the dependence from claim 15.

Allowable Subject Matter

5. Claims 15-18 are allowed. However the allowance would be reconsidered after the rejection for Paragraph 112 is overcome.

Conclusion
